Upgrading Rhythmyx Version 5.6 to Version 5.7

This document describes one major change from Version 5.6 to Rhythmyx Version 5.7. Customer intervention is required to take advantage of this change.

Ephox EditLive! for Java DHTML Editor

In Rhythmyx Version 5.7, a new rich text DHTML editor is introduced, Ephox EditLive! for Java. This control supersedes the Ektron eWebEditPro rich text DHTML editor.

You do not have to replace eWebEditPro with EditLive! You can continue to use eWebEditPro if you prefer. Note, however, that Percussion Software will only support the eWebEditPro control until November 2006.

NOTE: You cannot use both the EditLive! and the eWebEditPro controls in the same Content Editor. The two controls are incompatible, and you must use one or the other consistently within any Content Editor. You can, however, use the EditLive! control in one Content Edit and the eWebEditPro control in a different Content Editor.

To change the rich text DHTML editor for a field from the eWebEditPro control to the EditLive! control:

1   In the Rhythmyx Workbench, open the Content Editor application whose editor you want to change and double-click on the Content Editor resource.

Rhythmyx displays the Content Editor Properties dialog with the current configuration data for the Content Editor.

2   Select the Content Editor field whose control you want to change and click the [Edit] button.

Rhythmyx displays the Field Properties dialog.

3   In the **Control** field, click the drop list and choose *sys_EditLive*.

4   Rhythmyx automatically sets common parameters to the same values used for the sys_eWebEditPro control that was used for the field.

5   If you want to use a customized configuration file, or modify other parameters:

a)   Click the browse button next to the Control field.

Rhythmyx displays the Display Control Properties for <field> dialog.

b)   Enter the parameters and associated values you want to assign to the control.

c)   Click [**OK**] to save your edits.

6   On the Field Properties dialog, click [**OK**] to save the modifications you made to the field.

7   On the Content Editor Properties dialog click [**OK**] to save the modification you made to the Content Editor.

The changes will take effect the next time you start your application. To see your changes, stop and restart the application, log into Rhythmyx, and activate the editor.
