

Upgrading Rhythmyx Version 6.5x to Rhythmyx Version 6.5.2

In Rhythmyx Version 6.5.2, the Ephox EditLive rich text editor is upgraded to EditLive Version 6.3. In Content Editors, users will notice that fields using the `sys_EditLive` control are not available until they click in the field.

The `sys_EditLiveDynamic` control is deprecated in this release. Any field using the `sys_EditLiveDynamic` control should be modified to use the `sys_EditLive` control.

The `sys_EditLiveDynamic` control should not be used in new Content Editor fields (although it is still listed as an available control for fields in the Workbench).
